## **Dorf Ketal Announces Full Production at World's Largest Organic Titanate Plant**

APRIL 30, 2011 -- Mumbai, India - Dorf Ketal Speciality Catalysts today announced full production at its new, state-of-the-art organic titanate plant in Mundra, India. According to Sudhir Menon, Dorf Ketal Chairman, the plant will produce up to 10,000 metric tons of the industry's broadest portfolio of titanates annually, making it the largest facility of its kind in the world. The Mundra plant joins the company's recently expanded Dadra plant in shipping TYZOR®, and VERTEC™ organic titanates worldwide.

Dorf Ketal, the largest manufacturer of organic titanates, has grown rapidly through acquisition, beginning with the INTEC and TYZOR® titanate brands. In April 2011, the company acquired the patents, trademarks and related intellectual property for VERTEC™ polyester catalysts and SNAPCURE™ polyurethane catalysts.

John McChesney, general manager of Dorf Ketal Speciality Catalysts, points out that the company's focus is taking care of its customers. "We are now the world's only titanate manufacturer with a global supply and logistics network and two production facilities – the only supplier capable of meeting global demand for these versatile products – and the best is yet to come. Dorf Ketal's technical service group is working closely with our customers to help them improve performance in existing applications, and our R&D staff is already developing the next generation of high-performance organic titanates."

Dorf Ketal is a global manufacturer of process chemicals and additives for the oilfield industry, refineries, petrochemical plants and manufacturers of fuels and plastics. In less than 15 years, Dorf Ketal has emerged as India's largest manufacturer of these products. Dorf Ketal is a signatory to the principles of Responsible Care®, and the company's procedures and processes are certified to ISO-9001, ISO-14001 and ISO-18001 standards by Det Norske Veritas (DNV).
