FOR IMMEDIATE RELEASE

Dorf Ketal Lubricity Additives approved for Multi-Product Pipeline Co-transporting

SINGAPORE; November 4, 2016 - Dorf Ketal Chemicals India Private Ltd. (Dorf Ketal), a global leader in specialty chemicals for upstream and downstream oil and gas industries has been granted approval by Energy Institute's Aviation Committee for use of SR 2008 and SR 2010 in multi-product pipelines co-transporting jet fuel. The approval appears in EI 1535, 3rd edition of "Minimum criteria to determine acceptability of additives for use in multi-product pipelines co-transporting jet fuel www.energyinst.org/technical/safety/aviation/1535.

"Global Fuels Additives is a strategic growth market for Dorf Ketal and this listing provides a tremendous growth opportunity," commented Dr. Miltos Papachristos, CEO and President Global Fuels Additives. "EI 1535 is effectively the global guideline for the selection and use of lubricity additives by the global community of oil companies, oil traders and multi-product pipeline companies for co-transport of low and ultra-low sulphur gasoil."

"SR 2008 and SR 2010 are approved for use at the maximum 200 mg/kg treat rate which is sufficient to meet lubricity requirements of low and ultra-low sulphur gasoil," stated Jay Choksi, Vice President Global Fuels Additives. "Approval of our products for maximum treat rate is an important benefit for our customers since many competitor products are restricted to less than maximum treat rate. That restriction presents challenges for co-transport logistics or introduces risk in not meeting lubricity requirements."

About Energy Institute

The Energy Institute (www.energyinst.org) is the leading chartered professional membership body for the energy industry, supporting over 23,000 individuals working in or studying energy and 250 companies worldwide. The EI provides learning and networking opportunities to support professional development, as well as professional recognition and technical and scientific knowledge resources on energy in all its forms and applications.

About Dorf Ketal

Dorf Ketal Chemicals India Private Ltd. (www.dorfketal.com) is a privately owned specialty chemical company based in Mumbai, India with operations in the Asia Pacific, China, Europe, South America and North America. Dorf Ketal is the industry's fastest-growing provider of formulated specialty chemicals to upstream and downstream hydrocarbon markets and the market leader in organometallic catalysts and cross-linkers serving a broad range of applications and industries. The firm's core strategic focus on new chemistries is reflected in numerous patents and industry recognition for innovation to solve our customer's most demanding problems.
